

## ZERO EMISSION VEHICLES POLICY AT IEU

International European University (IEU) is committed to promoting environmental sustainability and reducing its carbon footprint. To this end, IEU recognizes the importance of implementing a Zero Emission Vehicles (ZEV) policy to support and encourage eco-friendly transportation options on all of its campuses. This policy is designed to foster a culture of sustainability and reduce air emissions through the use of alternative transportation.

### ***1. Policy Statement:***

IEU is dedicated to fostering a campus environment that promotes the use of zero-emission vehicles, such as bicycles and electric vehicles, to minimize the environmental impact of commuting to and from our campuses.

### ***2. Promoting Cycling:***

IEU campuses are designed to be cyclist and pedestrian-friendly, with designated internal roads free of vehicles. The University will continue to:

- Maintain and improve cycling infrastructure, including dedicated paths and bike racks.
- Implement and enforce speed limits and traffic signs on internal roads to ensure safety.
- Organize educational campaigns and workshops to raise awareness about the benefits of cycling and its positive environmental impact.
- Promote the use of bicycles as a preferred mode of transportation to and within the University.

### ***3. Supporting Cycling Initiatives:***

IEU will actively support and encourage the use of bicycles among students and staff by:

- Providing bicycle rental services for students and staff, including affordable or free options.
- Organizing cycling events and bike parades to promote community engagement and healthy lifestyle choices.

- Ensuring secure bicycle storage facilities on campus for students and staff.
- Offering incentives for those who choose cycling as their primary mode of transportation, such as preferred parking spots and rewards.

#### ***4. Electric Vehicle Charging:***

IEU's commitment to sustainability includes offering electric vehicle charging stations on one of its campuses. To support the use of zero-emission vehicles, the University will:

- Maintain and expand electric vehicle charging infrastructure as needed.
- Ensure free access to charging stations for students and staff.
- Provide information and resources to encourage the adoption of electric vehicles as an eco-friendly alternative.

#### ***5. Compliance and Evaluation:***

IEU will regularly monitor and evaluate the implementation and effectiveness of this Zero Emission Vehicles policy. The University will seek feedback from the community and make necessary adjustments to meet its sustainability goals.

#### ***6. Awareness and Education:***

IEU will organize regular awareness campaigns and educational programs to keep students and staff informed about the ZEV policy, its benefits, and the importance of reducing air emissions.

The International European University is committed to reducing its environmental impact and promoting eco-friendly transportation options. By implementing this Zero Emission Vehicles policy, IEU aims to create a more sustainable and environmentally responsible campus community while contributing to the global effort to combat climate change.
